The Architecture Billings Index (ABI) is a diffusion index derived from the monthly Work-on-the-Boards survey conducted by the AIA Economics & Market Research Group. The ABI serves as a leading economic indicator that tracks nonresidential construction activity by approximately 9-12 months. The survey panel consists of architects and design firms across all three sectors: commercial/industrial, institutional, and residential.

**National**
Firms continue their upward march in April
Graphs represent data from April 2017–April 2018.

**Regional**
Western firms report continued strong growth in billings
Graphs represent data from April 2017–April 2018 across the four regions. 50 represents the diffusion center. A score of 50 equals no change from the previous month. Above 50 shows increase; Below 50 shows decrease. 3-month moving average.

**Sector**
Commercial/industrial, and institutional firms see modest acceleration in billings
Graphs represent data from April 2017–April 2018 across the three sectors. 50 represents the diffusion center. A score of 50 equals no change from the previous month. Above 50 shows increase; Below 50 shows decrease. 3-month moving average.

**Practice**
Firms finding it difficult to find qualified architecture staff
Units of firms that currently have and decline positions, degree of difficulty in filling positions, % of firms
