2021 AIA Fellowship

Candidate David A. Keith
Organization Hanbury
Location Norfolk, Virginia
Chapter AIA Virginia; AIA Hampton Roads

Category of Nomination

Object 2 > Practice (Management)

Summary Statement

David Keith champions a model of practice driven by continuous talent development, creating a thriving culture of design excellence and transforming the firms that he leads and the communities and campuses in which he works.

Education

1982 – 1987

Virginia Tech College of Architecture and Urban Studies, Bachelor of Architecture

Licensed in:

Alberta (2019)

District of Columbia (2019)

Georgia (2019)

Florida (2019)

Michigan (2019)

North Carolina (1991)

Ohio (2008)

Ontario (2019)

Virginia (1992)

Washington (2019)

West Virginia (2019)

Wyoming (2019)

LEED AP BD+C

Employment

2017 – Present

Hanbury, Norfolk, Va. (formerly Hanbury Evans Wright Vlattas + Company)

CEO, Design Principal

3 years

2002 – 2017

Clark Nexsen, Virginia Beach, Va.

Principal, Design Director

15 years

1999 – 2002

TAF Group, Virginia Beach, Va.

Associate, Director of Architecture

3 years

1994 – 1999

BCW+H Architects, Richmond, Va.

Associate, Lead Design Architect

5 years

1989 – 1993

Odell Associates, Charlotte, N.C. and Richmond, Va.

Designer, Architect

4 years

1987 – 1988

Dellinger Lee Associates, Charlotte, N.C.

Designer

1 year

1985 – 1986

Browne, Eichman, Dalglish & Gilpin Architects, Charlottesville, Va.

Summer Internship

1 year

October 6, 2019

Nancy Rogo Trainer, FAIA
Chair, Jury of Fellows
American Institute of Architects

Re: Recommendation for Mr. David Keith, AIA: Nominee for FAIA

Dear Ms. Trainer and Jury of Fellows:

I am deeply honored to sponsor David Keith, AIA, for Fellowship under Object #2, Practice Management, in recognition of his visionary practice model, in which a continuous process of education to develop talent has allowed him to transform the firms that he leads and the communities and campuses in which he works.

I have known David since 1985, when we met as classmates while studying architecture at Virginia Tech, becoming the best of friends, personally and professionally, never more so than we are right now, as we both currently sit on Virginia Tech's School of Architecture Advisory Board. It has been rewarding to see the same infectious enthusiasm that David had for architecture in our studio days lead to a transformational practice model with tremendous relevance for the profession.

David invests in people, one at a time, through recruitment, education, mentoring, his Summer Scholars research projects and the continuous development of talent to lead to a culture of excellence. First at Clark Nexsen and now as President at Hanbury, he has done so without the benefit of an office located in an urban metropolis near to academia, but from Norfolk, Virginia. By transforming the cultures of two of the largest architectural practices in the Hampton Roads area, he has transformed architectural culture in the region. At Clark Nexsen, a firm that had won only two design awards in its first 80 years, David transformed the design culture, winning over 200 design awards (40 AIA) in 15 years, rising to #11 in the ARCHITECT Top 50, and winning the 2011 National AIA Intern Development Program Firm Award. In just four years at Hanbury, a similar story is unfolding, already winning over 14 AIA awards, with even larger aspirations.

Transforming a longstanding architectural practice is no easy task. I know this as President of Payette, where one of my goals has been to raise the national reputation of a firm that, despite a distinguished record of accomplishment, was flying under most architects' radar. Charting similar paths, David and I have shared how best to approach the challenges. His insights have contributed to Payette's success, which culminated in the 2019 AIA Firm Award. In one sense, David has had the harder job, as Clark Nexsen was for decades known simply as an engineering firm, doing mostly workaday projects for the military.

AIA Virginia recognized David's extraordinary accomplishments with its 2019 Distinguished Achievement Award, citing his impact on some of the state's most well-known architecture firms, as well as its cities and institutions. His impact on the profession more broadly can be seen not only in the many awards and publications and the ARCHITECT 50 ranking, but also in the network of relationships with major architecture schools and in the many alumni of his practice who have gone on to careers across the nation and the globe.

David Keith has established a standard of achievement worthy of elevation to Fellowship. He is an extremely talented architect, whose influence extends well beyond his practice to create a continuum of education for young designers entering the profession, while also investing tirelessly in the community in which he lives. It is with great conviction that I urge you to elevate David Keith to Fellowship in the Institute.

Respectfully submitted,

Kevin B. Sullivan, FAIA
President/CEO

2019 AIA Architecture Firm Award

David Keith champions a model of practice driven by continuous talent development, creating a thriving culture of design excellence and transforming the firms that he leads and the communities and campuses in which he works.

A CUSTOMIZED CAREER PATHWAY

David is a fierce advocate for growing the next generation of architects and professional leaders. Entering the profession in 1987, in the first Intern Development Program class, he observed that few firms had a clear approach to helping young architects grow professionally and personally. Ever since, he has analyzed how architects learn. Beginning with his first opportunity to mold practice culture, he has shaped teaching firms that deepen and accelerate that learning, providing intentional opportunities for growth with every project.

David structures his practice to create a continuum of education for young designers entering the profession. His expanding firm's new offices are located near architecture schools. He works closely with schools to understand what students are looking for. In three years of formal discussions with students at Virginia Tech, Hampton University, UVA, Columbia and Yale, he sought insight on three questions: What are you looking for from a firm? What are you looking for in a location? What do you offer a firm? Out of this exchange and his personal experiences, David developed his firm's career development and talent recruitment programs.

SUMMER SCHOLARS RESEARCH PROJECTS

A pivotal element of David's approach is the Summer Scholars program, which has brought young people from more than 25 prestigious schools of architecture throughout the US, Canada, Mexico, India and China to engage in research and design that achieves real-world significance.

THE TOOLS OF A TEACHING PRACTICE

- » **Research:** David does not limit research to the Summer Scholars, but incorporates it into studio practice, to enable individuals to explore subjects about which they are passionate. David works to bring these projects to realization, to build each designers' confidence that they can complete outstanding projects.
- » **Mentoring:** David's Responsibility Matrix (presented as a case study in *The Architect's Handbook of Professional Practice*) enables young designers to assess abilities, identify personal growth agendas, and communicate those agendas to teammates. This process takes place at every project

phase kick-off, when young team members identify both the strengths they will bring to the project and five or six goals for growth. The project manager is expected to incorporate two or three of these goals into the team's work plan, thus ensuring professional growth with every project and providing an opportunity for each employee to shape their career track in a personal way. This approach creates motivated and highly effective teams that often over-perform.

- » **Expectations of Senior Staff:** The incorporation of goals for growth into work plans is a core expectation of senior staff. Because it puts young people in unfamiliar situations, they will at times make mistakes. David closely guides how senior staff responds to such mistakes, enforcing a strict "No Assholes Rule": no getting mad, no beating people up, no blaming. It is a moment for teaching.

DESIGN EXCELLENCE

The outward fruit of systematic talent development is design excellence across a wide range of contexts, from conventional practice, focused on higher education, civic and commercial projects; to pro bono practice, advancing the missions of organizations like Operation Smile; to rigorous design-build work for the US military; to regional community development.

FIRM TRANSFORMATION

The inward payoff of talent development is firm transformation. The most vivid measure of David's success is the transformation of Clark Nexsen, a largely unrecognized firm that had won only two design awards in its first 80 years. In the 15 years he was its Director of Architecture and Design Director it won over 200 — more than 40 of them from the AIA — and rose to #11 in the ARCHITECT magazine 50. As well, the A/E firm grew from 185 people with 25 architectural staff to over 500 with 85 architectural staff. His current firm, Hanbury, with David in his fourth year as President and CEO, is on a similar trajectory.

The profession has long sought better models for bridging between school and practice. David Keith's teaching office, its success abundantly proven, is just such a model.

2.1 ACCOMPLISHMENTS SIGNIFICANT WORK

Hanbury

Colonial Williamsburg Foundation: District Master Plan, Williamsburg, VA
 Estimated Completion: 2023 – 2030
 Role: Design Principal
(see Exhibit 6)

Colonial Williamsburg Foundation: Entertainment and Sports Complex, Williamsburg, VA
 Estimated Completion: 2024
 Role: Design Principal

University of Virginia: Hotel and Conference Center, Charlottesville, VA
 Estimated Completion: 2023
 Role: Design Principal
(see Exhibit 4)

Colonial Williamsburg Foundation: Nassau Street and P6 Block Historic District Development Plan, Williamsburg, VA
 Estimated Completion: 2022
 Role: Design Principal

Elizabeth River Trailhead, Norfolk, VA
 Estimated Completion: 2022
 Role: Design Principal

Virginia Beach Innovation Community, Virginia Beach, VA
 Estimated Completion: 2022
 Role: Design Principal

SIGNIFICANT PUBLICATIONS

The American Institute of Architects: *The Architect's Handbook of Professional Practice* Fifteenth Edition

"How to avoid a toxic work culture," *Architecture Magazine*, March 2019 Interview with David Keith

TALENT DEVELOPMENT: David's approach to building a successful design firm has focused on attracting and growing talent by offering unlimited opportunities to talented young architects that are passionate about the profession.

PROBLEM: The architectural profession offers minimal guidance to develop architects' professional and leadership skills. The multifarious assortment of skills required of an architect is often overwhelming for young architects. Which skills are important to learn and when? To help structure the first few years in the profession, the Intern Development Program created a series of focused contact areas to ensure that young architects develop skills in each phase of project development. While helpful, the IDP is only a general measure of progress, and often young architects feel that they are stuck repeating the same tasks and do not have a way to communicate an attainable career growth path.

SOLUTION:

David has developed a project team structure that ensures everyone on the team grows professionally and personally with every project. This focus on daily talent development creates highly motivated and effective project teams and continuous firm improvement.

Throughout his career at Clark Nexsen and now Hanbury, David has personally sought out the best and brightest graduates from top design schools around the nation. He hires an average of three to four graduates each year, with the goal of attracting the best talent to his firm. Selection criteria include outstanding storytelling, graphic, design, and leadership skills. Passion for the profession is a must. He believes that, if you hire intrinsically motivated talent, with strong skills, and provide opportunities for personal and professional growth, they always over-achieve. They do not require heavy-handed oversight, but a teaching environment where they are empowered to exceed expectations. David's approach to project leadership ensures

that the firm will improve with each project. Each employee has an opportunity to voice personal and professional goals with each project, and senior staff is expected to incorporate at least two to three of each team member's goals into their work plans for the projects...ensuring extremely motivated employees. Senior staff are there to help when needed, but young architects are afforded unique opportunities to learn new skills, develop project ideas, and engage in the community, culture and profession. The results of this approach speak for themselves.

◀ Clark Nexsen's approach to professional development under David's leadership was featured in the 15th edition of *The Architects Handbook of Professional Practice*.

▼ David collaborating with Alec Yuzhbabenko, AIA, who started as a summer student with Clark Nexsen then became a Designer at Clark Nexsen and currently is an Associate Design Principal at Hanbury.

DECLARATION OF RESPONSIBILITY

I have personal knowledge that David was largely responsible for design of the exhibit listed above.

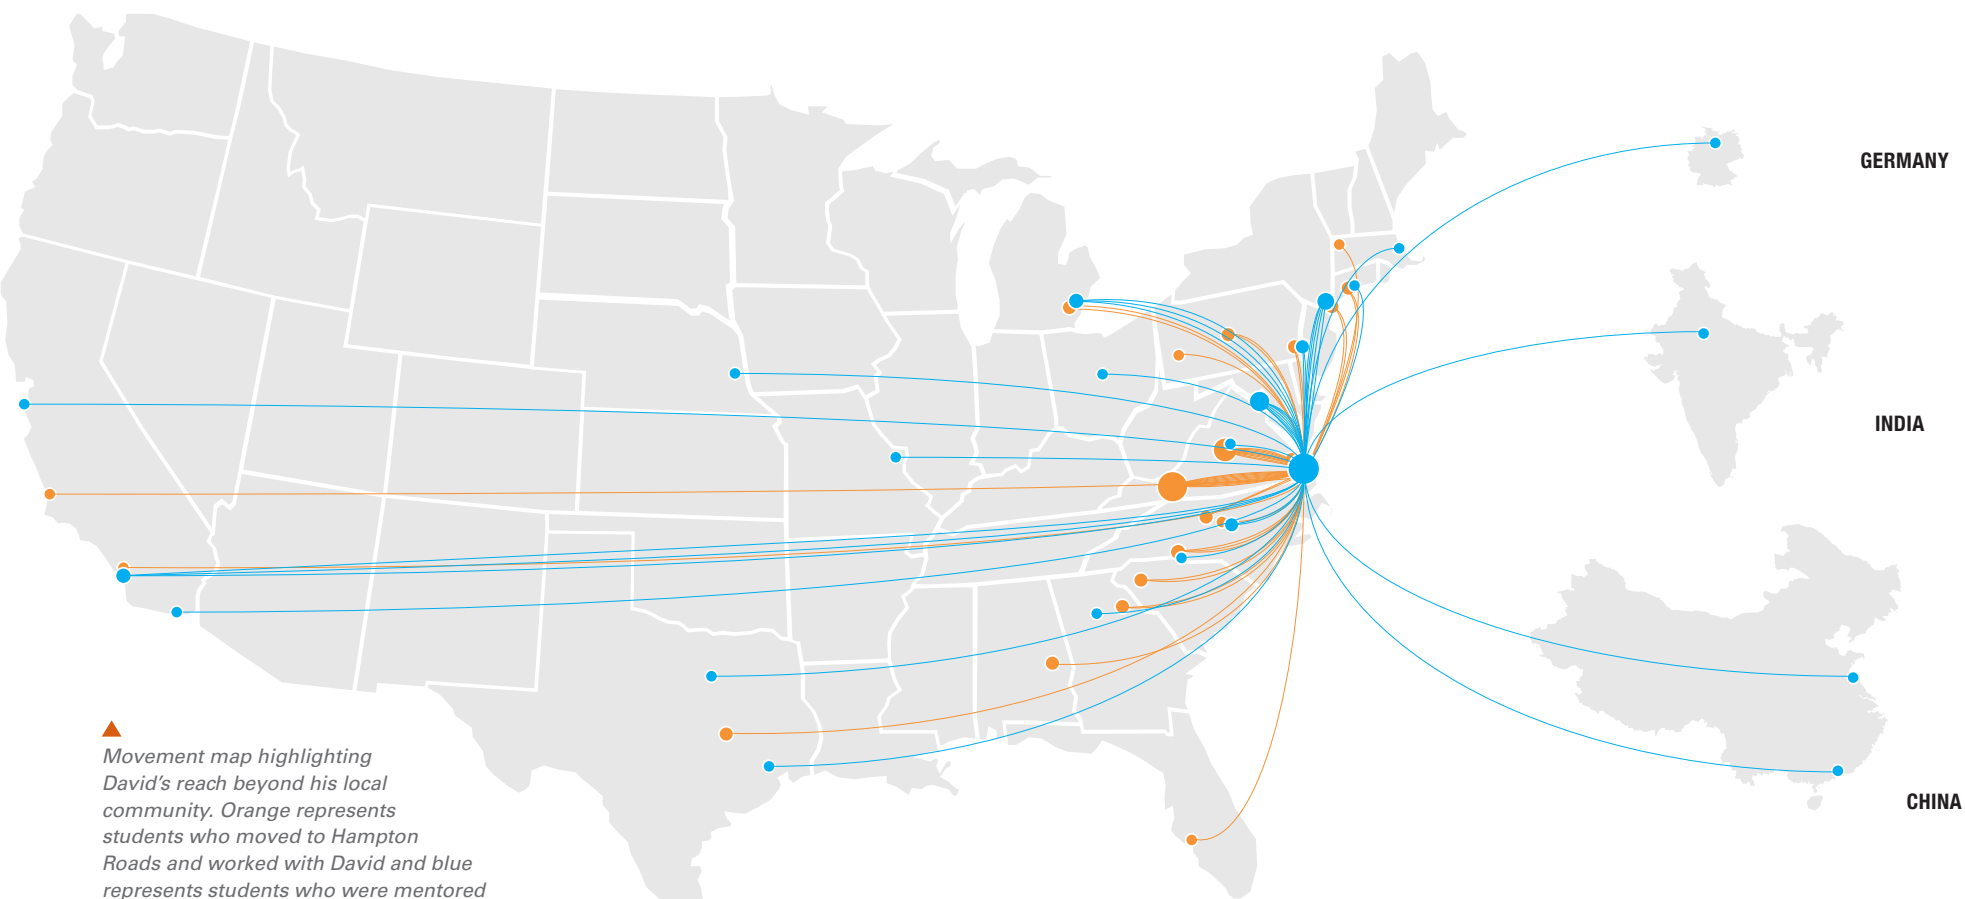

Patrick O'Keefe

Principal, Hanbury (2019 – 2020)

Principal, Clark Nexsen (2004 – 2019)

Relationship to the exhibit: Hanbury's Raleigh Office Leader and Clark Nexsen colleague

3.1 EXHIBIT #1 TALENT DEVELOPMENT: CUSTOMIZED INDIVIDUAL CAREER PATHWAYS

▲ Movement map highlighting David's reach beyond his local community. Orange represents students who moved to Hampton Roads and worked with David and blue represents students who were mentored by David and have gone on to pursue careers outside of Hampton Roads.

"In 2005, as a young graduate, David recruited me to join Clark Nexsen. He has a genuine heart to listen and talk with young professionals. His dedication truly shaped the office environment, into a healthy and sound design-focused environment which ultimately helped me grow well in this profession. He is and will always be my best mentor."

Chris W.H. Cho, AIA, Managing Director, THEEAE LTD, Hong Kong
Finalists for the LA Museum of Contemporary Art competition

"David has been a consistent influence, source of optimism and generous encouragement throughout my career – for nearly two decades. He first hired me as an undergraduate intern, I returned to work for him after receiving a graduate degree in architecture, and then joined him at Hanbury after an MBA and a career in real estate development in Silicon Valley. His commitment to design excellence inspired the early stages of my career. However, it is his success building firms that elevate the role of architecture in the communities they serve, including my hometown, that has brought me back to work with him again and again."

Katie Parker, AIA, LEED AP, Civic & Commercial Market Leader, Hanbury

**SIGNIFICANT AWARDS & PUBLICATIONS
(REFERENCE SECTION 2.2-2.3 FOR A
FULL LISTING)**

2019 Merit Award for Architecture, AIA Hampton Roads, “[RE]Norfolk: Using Water to Create Connection, Identity, and Resiliency at Harbor Park” Summer Scholar Project

2015 AIA Hampton Roads Merit Award, Unbuilt: “Central Beach Parkway” Summer Student Research Project

2015 DBIA Hampton Roads Project of the Year: Operation Smile World Headquarters Virginia Beach, Virginia; “LEED Analysis” Summer Student Research Project

2012 AIA Virginia Award for Research: “The Sustainability of Materials” Summer Student Research Project

2009 Construction Specifications Institute National Award for Research: “An Approach to Systems” Summer Student Research Project

CHALLENGE: Summer Internships for architectural students’ too often are not organized around developing students’ skills and passion for the profession. Internships in many firms have time gaps with no work assignments or consist of drafting red-lines on a multitude of projects they get to know little about. Work assignments often lack a meaningful sense of accomplishment, and interns have little to show for their efforts at the end of the summer.

RESPONSE: David structured a program for Summer Students around design research, project and team leadership, graphic design, and public speaking. Each year, his firm sponsors a student-led research project that is conceived, researched, designed, and formally presented and documented over the course of the summer.

OUTCOMES: In the past 20 years, David’s Summer Student (now Summer Scholar) program has attracted over 60 students from 25 schools across the nation and internationally. Their research has enhanced the design practices of the firm, developed strategic planning initiatives across Hampton Roads, and enhanced recruitment of top design talent to a region that typically cannot attract it. Many of the projects have won research and design awards, and some have been the basis for significant community development. The program has become so popular that, in 2020, prior to the pandemic, Hanbury received over 100 applications for four positions.

In 2010, four Summer Students focused their research on the redevelopment of Norfolk’s Waterside. Their research and presentation book were so embraced by the City of Norfolk that they were used to attract developers. Ultimately, Clark Nexsen was asked to work with one developer to propose a new Hotel and Conference Center for the site, demonstrating the power of the Summer Research project and its potential influence in the community and for the firm.

Subsequent research projects have often focused on strategic growth or redevelopment areas in and around Hampton Roads.

- » “DenCity” focused on Transit Oriented Development in Virginia Beach and led to proposals for a new City Hall and Union Station.
- » “Emerald and Sapphire City” was a community-based resiliency design for a Virginia Beach neighborhood. The City is implementing many of its strategies.
- » “Virginia Beach Pier” contemplated a new oceanfront pier and park, for which two developers have since asked our firm to design proposals.

At the end of the summer, students formally document their research. The publications are used by the office and are a valuable addition to students’ portfolios.

David collaborating with Hanbury’s 2019 Summer Scholars Aayush Das Anat and Tianci Liang

DECLARATION OF RESPONSIBILITY

I have personal knowledge that the programs in this exhibit were under David’s direction.

3.2 EXHIBIT #2 TALENT DEVELOPMENT: SUMMER SCHOLARS PROGRAM(S)

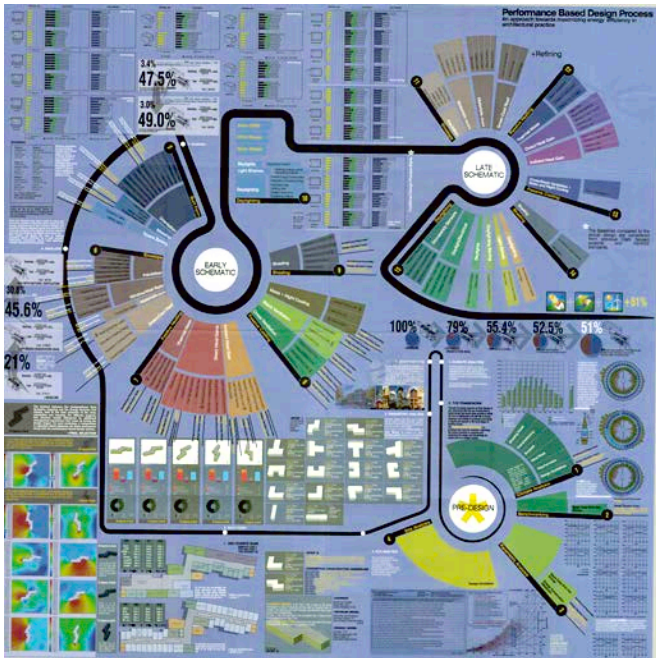

◀ ZERO: PERFORMANCE BASED DESIGN PROCESS – AN APPROACH TOWARDS MAXIMIZING ENERGY EFFICIENCY IN ARCHITECTURAL PRACTICE, CLARK NEXSEN, 2011, DIRECTOR OF ARCHITECTURE/MENTOR

To better understand the impacts of energy efficient design on the design process, students used the Virginia Tech Corps of Cadets Residence Hall as a case study in NET-ZERO design. The study led to important changes to our design process for achieving maximum effectiveness.

▼ [RE]NORFOLK, HANBURY, 2018, CEO/MENTOR

With flooding threatening the destruction of billions of dollars of property, the City of Norfolk recognizes how imperative it is to maintain a healthy relationship with water. Our Summer Scholars team learned about “living with the water” and the social implications of new resilient development. They researched resiliency in the context of Norfolk, precedent cities, and projects across the world, and strategies to promote healthy living and clean energy use.

3.2 EXHIBIT #2 TALENT DEVELOPMENT: SUMMER SCHOLARS PROGRAM(S)

“While working with David, I have evolved from a summer and winter intern at Clark Nexsen, to a Design Architect and Associate Design Principal at Hanbury. I can confidently say that I would not be where I am without his leadership, confidence and support. Despite my age and lack of experience, David continuously engaged me in meaningful project work, firm strategy discussions, confidential client meetings and countless interviews which expedited my growth and experience beyond my years. David has always made sure that my opinion was heard and valued. He creates an open platform that allows young designers to succeed. He trusted in my capabilities and also made sure to create opportunities and support for me to flourish, so I could become my own design leader. It is rare to find a mentor that so selflessly and tirelessly promotes those around him. David’s approach to leadership not only allows for everyone to feel heard, but motivates them to contribute. Throughout the years, I have been fortunate to call David my boss, collaborator, and friend.”

▲ **ATLANTIC PARK MIXED-USE DEVELOPMENT, HANBURY, 2017 – CURRENT, DESIGN PRINCIPAL**

Atlantic Park is a homegrown, visionary, mixed-use development designed to capture the heartbeat of the Virginia Beach community. The project has been greatly influenced by Alec Yuzhbabenko’s Virginia Tech Thesis project for a Surf Lagoon, which he completed upon returning to college after his Central Beach Parkway Summer Student research project.

► **CENTRAL BEACH PARKWAY, CLARK NEXSEN, 2014, DIRECTOR OF ARCHITECTURE/MENTOR**

Alec Yuzhbabenko and Yingfei Wang collaborated to create a parkway connector between the boardwalk and the new arena district in Virginia Beach. This project has helped spur economic development in and around the proposed areas and has helped establish Alec as a major leader in design in the Hampton Roads Community since returning to the area upon graduation.

CENTRAL BEACH PARKWAY

A SUSTAINABLE YEAR-ROUND AMENITY THAT IS CONVENIENT FOR LOCAL RESIDENTS AND WELCOMING TO THE VISITOR.

Alec Yuzhbabenko, AIA, Hanbury Associate Design Principal

SIGNIFICANT PUBLICATIONS

Camp Grom featured on FoxNews for the Grand Opening Celebration
Numerous features in the *Virginian-Pilot* newspaper and local news channels (see Section 2)

CHALLENGE: Non-profits’ strong missions allow them to succeed in helping others, but they often need design help to raise the necessary support to build around their missions. As well, the Hampton Roads community has too often grown around strictly market-driven planning, leading to suburban sprawl, often in flood-prone areas.

RESPONSE: Through a series of community engagement activities, research initiatives, and non-profit support efforts, David has enhanced the lives of people throughout his community and elevated the level of design and sustainability throughout the region. Young staff are always included.

OUTCOMES: David’s pro-bono efforts have resulted in donations of land, in-kind services, and millions of dollars. His leadership in planning and design in and around Hampton Roads is re-shaping the community through resiliency, economic development, sustainability and community empowerment.

David has led many research initiatives without external funding, which support the community while continuing to nurture the skills and passions of staff at all levels:

- » Clark Nexsen Urban Design Focus Group: Rethinking the Suburbs – redevelopment plans for five neighborhoods.
- » Real Sustainable Solutions for Virginia Beach Clark Nexsen Task Force: Developed a strategy and plan of action for cleaner air and water, locally sourced organic food, community fitness, sustainable energy, green jobs and industries, and walkable, vibrant neighborhoods.
- » Summer Student Pro-bono Planning Projects (see exhibit 2): Central Beach Parkway, DenCity, RE-Norfolk, No Small Plans, Virginia Beach Pier, Military Circle, Waterside Redevelopment, and Emerald and Sapphire City.

◀ ACHIEVABLE DREAM ACADEMY & SOMETHING IN THE WATER, HANBURY, 2019 – 2020, DESIGN PRINCIPAL

David and Hanbury have worked with Pharrell Williams in support of The Virginia Beach Achievable Dream Academy and the Something in the Water Festival. Achievable Dream Academy provides a year-round, extended-day education with enrichment classes, field trips, the support of community partners and mentors, and high-quality academic instruction for middle and high-school students.

Hanbury has provided graphic, planning, and public support of Pharrell Williams’ inaugural Something in the Water Festival, which attracted over 35,000 visitors and yielded a \$21.8 million economic impact for Virginia Beach. David connected Nik Smith to the organizers of the event, and he will speak at the upcoming Festival.

"My first job out of college turned out to be a 10+ year career designing theme parks around the world at Walt Disney Imagineering, and the architectural

internship that prepared me for that career was at Clark Nexsen in 2007, under the mentorship and guidance of David Keith. The design lessons he handed down were actually life lessons. When I was hesitant on some design choices, he would remind me that it's best to craft certain designs in a bold and decisive manner, rather than to create something that feels like a mistake. This and many more of David's lessons I took with me to Disney, and throughout life. His support from my college years to this very day is something that is invaluable."

Nikkolas Smith, Concept Artist/Illustrator, www.nikkolas.com

3,3 EXHIBIT#3 DESIGN EXCELLENCE: COMMUNITY ENHANCEMENT THROUGH PRO BONO SERVICE

▲ OPERATION SMILE HEADQUARTERS, CLARK NEXSEN, 2006 – 2012, DESIGN PRINCIPAL

David provided programming, design and fund-raising materials for a new headquarters for Operation Smile, which performs critical surgeries for people across the globe. Through his efforts, Operation Smile obtained land from the City of Virginia Beach and the Virginia Community College system, and the city donated over \$3.5 million in land improvements.

◀ JT'S CAMP GROM, HANBURY AND CLARK NEXSEN, 2012 – 2019, LEAD ARCHITECT

The only camp of its kind on the East Coast, this 70-acre, beach-style adventure camp is designed to welcome wounded veterans, families of the fallen, and adults and children with disabilities or special needs. The fully accessible camp includes a welcome center, wellness center, amphitheater, cafeteria and tiki café, lake with fishing pier and cable-wakeboarding, adventure ropes course, and an aquatic center featuring a splash park.

▲ VIRGINIA AFRICAN AMERICAN CULTURAL CENTER, HANBURY, 2019 – 2020, DESIGN PRINCIPAL

David is leading design of the Virginia African American Cultural Center, a place that will bring people together, foster community, provide education, and celebrate African American history and culture. The architecture will embody the oral transmission of history through generations of African culture, telling stories through the building's surfaces, light and shadow, graphics and technology. The project has obtained land from the City of Virginia Beach and commenced fund-raising.

◀ NAVY SEAL MONUMENT, CLARK NEXSEN, 2016 – 2017, DESIGN DIRECTOR

David worked with local Navy Seals and the City of Virginia Beach to find a location, and his leadership resulted in the donation of public land on the Virginia Beach Boardwalk and full funding within two years. The monument's centerpiece is the iconic Naked Warrior statue. A timeless symbol of SEAL history, it depicts a WWII Underwater Demolition Team swimmer facing the ocean, gathering himself for a combat mission. He is life-size, denoting that the SEAL reputation was made not by supermen, but by ordinary men who do extraordinary things for their country.

Recognized by Building Design and Construction as one of the Top 10 Architecture Firms for University Work for seven straight years 2011-2017

2017 AIA Hampton Roads, Honor Award, JTCC, Academic & Performing Arts Building, Midlothian, Virginia

2017 USACE, Building for the Future Award, West Point Davis Barracks U.S. Military Academy in West Point, NY

2017 Boston Society of Architects Citation, Award for Higher Education, JMU School for Art and Art History - Duke Hall (GUND Partnership/Clark Nexsen) Harrisonburg, Virginia

2012 AIA DC, Presidential Citation for Sustainable Design, GCC Fredericksburg Campus Science & Engineering Building/Information Commons Fredericksburg, Virginia

CHALLENGE: When David joined Clark Nexsen in 2002, many significant higher education projects in Virginia were designed by out-of-state architects, with little design influence from Virginia-based firms. Clark Nexsen had few opportunities to shape campus environments in meaningful ways, due to its primary focus in Federal Government projects.

RESPONSE: David committed much of his early work at Clark Nexsen to developing the Higher Education market, focusing on Virginia colleges and universities. Since 2005, he has led design for over 20 higher education projects and helped build two of the most successful Higher Education practices in the nation.

OUTCOMES: David's designs for higher education institutions have won numerous awards and much of his work has been featured nationally through the Society of College and University Professionals and American College and University Housing Officials organizations. Clark Nexsen was recognized as the #8 University design firm by *Engineering News Record* at the time he left to lead Hanbury. In just 3 years, since joining Hanbury, the firm has won numerous higher education projects across the nation including projects at Princeton University, University of Virginia, Tulane University, Indiana University, Michigan State University, Purdue University, Florida Atlantic University, Duke University, Virginia Tech, and University of Notre Dame.

◀ VIRGINIA COMMONWEALTH UNIVERSITY, GLADDING RESIDENCE CENTER, CLARK NEXSEN/AYERS SAINT GROSS, 2016, DESIGN PRINCIPAL

The new 12-story facility in the urban Richmond VCU campus overlooking historic Monroe Park expands the University's housing capacity, enabling it to house the entire freshmen student body. Integrating a historic bathhouse, it is subdivided into six "neighborhoods" of 250 students each, fostering an intimate sense of community.

DECLARATION OF RESPONSIBILITY

3.4 EXHIBIT #4 DESIGN EXCELLENCE: ARCHITECTURE FOR HIGHER EDUCATION

**JAMES MADISON UNIVERSITY
DUKE HALL SCHOOL OF ART & ART HISTORY
CLARK NEXSEN/GUND PARTNERSHIP, 2012, DESIGN PRINCIPAL**
Adjacent to the historic Quad, Duke Hall was built in 1967 for the Music, Theatre and Art Departments. The renovation and addition created a new home for the university's thriving Visual Arts programs. Creating safe learning environments that inspire arts exploration was central to the design approach.

3,4 EXHIBIT #4 DESIGN EXCELLENCE: ARCHITECTURE FOR HIGHER EDUCATION

▲ VIRGINIA TECH, CREATIVITY AND INNOVATION DISTRICT LIVING/LEARNING COMMUNITY, HANBURY, 2021, DESIGN PRINCIPAL

This new living/learning community for Arts and Architecture, housing 600 students in the emerging Creativity & Innovation District, is a realization of Virginia Tech's "Beyond Boundaries" initiative. Combining rehearsal and performance, teaching, and maker spaces with residential and community spaces, it promotes innovation by mixing disciplines in an open, collaborative environment.

◀ UNIVERSITY OF VIRGINIA, HOTEL AND CONFERENCE CENTER, HANBURY, 2023, DESIGN PRINCIPAL

The University of Virginia has embarked on an ambitious project: to build a new kind of university hotel, conference, and visitor's center, which will bring together prospective students, faculty, athletes, visitors of all kinds, and the public. The Hotel and Conference center will anchor the Emmet Ivy corridor, which links the historic Lawn and surrounding undergraduate precinct with the university's athletic facilities and many of its graduate schools. Deborah Berke Partners is collaborating with Hanbury to lead the design for the University.

3.4 EXHIBIT #4 DESIGN EXCELLENCE: ARCHITECTURE FOR HIGHER EDUCATION

◀ **JOHN TYLER COMMUNITY COLLEGE, ACADEMIC & PERFORMING ARTS BUILDING, CLARK NEXSEN, 2016, DESIGN DIRECTOR**

Embracing JTCC's slogan, "Not What You'd Expect," the building challenges preconceived notions to make surprising connections. The volume of its black box theater breaks into the surrounding gathering spaces, and a third-floor outdoor classroom provides a new, expansive teaching and learning experience.

◀ **GERMANNA COMMUNITY COLLEGE, SCIENCE, ENGINEERING & LEARNING RESOURCE CENTER, CLARK NEXSEN, 2012, DESIGN PRINCIPAL**

Providing new science classrooms and state-of-the-art laboratories, the Learning Resource Center faces the central campus green with high-demand collaboration and meeting space, along with traditional library spaces.

CHALLENGE: Too often, projects designed for the US Military are generic and repetitive. While this approach works for some facility types, projects with unique user needs on significant sites require special attention to design and context.

RESPONSE: David developed an approach that embraces military procurement processes but ensures that users have influence on the outcomes and that designs reflect the values and aspirations of the setting.

OUTCOMES: David's team has been selected for many of the US Military's most prominent projects. His designs have enhanced the military experience and been widely recognized for design excellence. His innovative approach to Design-Build for the military is the subject of a study he conducted for the National Institute of Building Sciences, which is being applied to change procurement rules.

SIGNIFICANT PROJECTS:

- » Naval Sea Systems Command (NAVSEA) Headquarters
- » Walter Reed National Military Medical Center Warrior Transition Unit

◀ **U.S. MILITARY ACADEMY, DAVIS BARRACKS AT WEST POINT, CLARK NEXSEN, 2015, DESIGN DIRECTOR**

The new Davis Barracks, designed in keeping with the Central Post's designation as a National Historic Landmark, is a state-of-the-art building that respects the traditional requirements for the cadet lifestyle. Its high efficiency systems – radiant heating and cooling, dedicated outdoor air, heat recovery, solar thermal, and aggressive infiltration measures – meet West Point's Net Zero goals.

DECLARATION OF RESPONSIBILITY

I have personal knowledge that David was largely responsible for design of the exhibit listed above.

3.5 EXHIBIT #5 DESIGN EXCELLENCE: DESIGN LEADERSHIP FOR THE US MILITARY

▲ **TRANSIENT WOUNDED WARRIOR LODGE AT WALTER REED NATIONAL MILITARY MEDICAL CENTER, CLARK NEXSEN, 2012, DESIGN PRINCIPAL**

Designed to help provide the final phase of care for our wounded soldiers, sailors, and airmen, the Transient Wounded Warrior Lodge is part of the larger Wounded Warrior Complex at Walter Reed Medical Center. These live-in facilities provide world-class care and training to our recovering troops and their families and enable them to heal, rehabilitate, and return home.

▲ **NAVSEA HEADQUARTERS, CLARK NEXSEN, 2014, DIRECTOR OF ARCHITECTURE**

On September 16, 2013, NAVSEA Headquarters was the scene of a mass shooting. Twelve people lost their lives and eight others were injured. NAVFAC called on Clark Nexsen and a number of partners, including CH2M, to develop design concepts to restore the historic headquarters. The project, completed in a compressed schedule of less than 16 months, mitigates the emotional impact on the returning workforce by creating a new sense of place and identity.

◀ **WARRIOR TRANSITION UNIT, WALTER REED NATIONAL MILITARY MEDICAL CENTER, CLARK NEXSEN, 2011, DESIGN PRINCIPAL**

The 700,000 square foot complex was awarded to Clark Nexsen as the result of a national Design-Build competition. This significant project at Walter Reed Medical Center, designed to help wounded warriors heal effectively in all capacities, created many new Federal Government design opportunities for Clark Nexsen.

3.5 EXHIBIT #5 DESIGN EXCELLENCE: DESIGN LEADERSHIP FOR THE US MILITARY

▲ **VIRGINIA TECH, PEARSON HALL AND NEW CADET HALL, CLARK NEXSEN, DESIGN DIRECTOR**

Commissioned through a national design competition, Clark Nexsen's winning proposal houses 1,100 students, enhancing every aspect of cadet life while reinforcing the university's historic sense of place and identity. The traditional "VT" logo has been integrated into the landscape, which the Corps of Cadets uses for daily formations. This courtyard has become the iconic center of the Virginia Tech campus.

VIRGINIA MILITARY INSTITUTE, 3RD BARRACKS, CLARK NEXSEN, 2009, DIRECTOR OF ARCHITECTURE ▶

The 3rd Barracks was designed to complement the Gothic detailing of the existing National Historic Landmark. The team worked closely with the VMI Post Historian and the Virginia Department of Historic Resources to ensure that the 3rd Barracks accurately reflected the vernacular established more than 150 years ago.

Raleigh Office Leader and Clark
Nexsen colleague**CHALLENGE:** Historically, economic growth and community
development of the Hampton Roads region have lacked vision
and clarity of direction. Additionally, Clark Nexsen, whose
work prior to 2002 was hidden on military bases, was thought
of primarily as an engineering firm. It had little opportunity to
make an impact in the community.**RESPONSE:** In 2002, the firm successfully teamed with SOM
to win the Virginia Beach Convention Center project. Leveraging
this prominent new project, David immediately expanded Clark
Nexsen's focus to take a leadership role in Civic and Community
projects. He developed strong relationships with city leaders
throughout the region, to better understand what each city
is trying to accomplish and where they want to focus their
efforts and investment. His planning and development project
partnerships help each community achieve its vision. David's
work with these partners has expanded with his move to
Hanbury, and every client he previously worked with continues
to work with him today.**OUTCOMES:** David has planned and designed large-scale
projects through-out the Hampton Roads region, leading to
over \$3 billion in construction and thousands of new jobs while
ensuring the development reflects the values and aspirations
of the community.▲ ATLANTIC PARK MIXED-USE DEVELOPMENT,
HANBURY, 2017 – CURRENT, DESIGN PRINCIPAL◀ CENTRAL BEACH
DEVELOPMENT PLAN, CLARK
NEXSEN, 2015, DESIGN PRINCIPAL

In 2015, as part of the initiative for the Virginia Beach Arena, David was asked to create a development framework for the area from the Arena to the Boardwalk. Since the creation of this plan, he has been hired to perform 10 separate development proposals within the small Virginia Beach resort district, and Hanbury is now the go-to firm for projects there.

▲ **CITY OF VIRGINIA BEACH SPORTS CENTER, HANBURY, 2020, DESIGN PRINCIPAL**

The new Sports Center places Virginia Beach among the top national sports tourism destinations. It was designed with input from the NCAA and World Indoor Track & Field to ensure it is able to host their tournaments. With 12 basketball courts, an indoor track, and seating for over 5,000, it is the largest multi-purpose basketball/volleyball/wrestling facility on the East Coast.

◀ **BLOCK 9, CLARK NEXSEN, 2015, DESIGN DIRECTOR**

The mixed-use project brings the public to a 2nd level concourse, offering an outside dining and theater experience overlooking Virginia Beach's Town Center plaza.

▲ **COLONIAL WILLIAMSBURG DISTRICT MASTER PLAN, WILLIAMSBURG, VA, HANBURY, 2020, DESIGN PRINCIPAL**

With the successful completion of Hanbury's master planning for its Historic District, the Colonial Williamsburg Foundation asked David to develop ideas for their current Visitor Center site. Initially programmed and designed with a Sports Center, Aquatic Center, and retail space around a central green, the plan was so embraced by the surrounding communities and William & Mary that they added a Community Amphitheater, Performing Arts Center, Multi-family Apartments and Offices to the plan and have taken formal action towards development.

◀ **GATEWAY MIXED-USE CENTER, NORFOLK, VA, HANBURY, 2020**

The 20-story, LEED Certified, Class-A office tower complements a hotel and apartment units. Designed in collaboration with the City of Norfolk and three development partners, it will help connect the downtown to the waterfront by extending Main Street around City Hall. This vital investment in downtown will serve as a catalyst for growth to the west and reinforce Downtown Norfolk's position as a place to live, work and play.

2007 Inside Business Hampton Roads Best Place to Work: Hall of Fame

CHALLENGE: Prior to David’s arrival in 2002, Clark Nexsen’s work was primarily for the federal government, and the firm had won only two AIA design awards in 82 years. The staff was mainly comprised of architects who grew up or went to school in the area.

RESPONSE: Within two years of joining the firm, David was appointed Director of Architecture. In this role, he revamped the firm’s work environment, hiring practices, talent development, and project pursuit and design approaches.

OUTCOMES: In his 15 years with Clark Nexsen, the firm transformed into a design firm recognized widely as one of the best in the nation. It grew while diversifying its market-base, becoming more design-focused, and attracting talent from throughout the nation. It became the only Virginia-based design firm recognized in the ARCHITECT 50 in the past 10 years.

Since David joined Hanbury as President/CEO in 2017, he has put it on a similar trajectory. In his short time there, the firm has won 10 AIA design awards and doubled in size and revenue. He has reinvigorated a historically successful design practice and infused a new enthusiasm, design focus, and hope for even greater things in the future.

“I believe that there is a design opportunity in every project; that outstanding architecture does not rely upon great budgets or sophisticated clients, more it relies upon a precise vision executed thoroughly by skilled professionals with great attention to detail; I also believe that the best architecture in the world can be practiced anywhere in the world, including Norfolk, Virginia.”

David Keith, AIA

3.7 EXHIBIT #7 TALENT PAYS OFF: FIRM TRANSFORMATION

CLARK NEXSEN OFFICE ENVIRONMENT, VARIOUS LOCATIONS, 2002 – 2017, DIRECTOR OF ARCHITECTURE

When David arrived at Clark Nexsen, the firm was primarily an engineering / architecture firm with few design awards. He was challenged by the firm to help them become more design oriented. Among the changes he made as Director of Architecture was a transformation of the work environment, relocating offices to urban settings, with more open and collaborative work spaces that are conducive to teaching. This transformation was manifested over 10 years across the firm as it grew.

As part of David's ongoing relationship with Virginia Tech's College of Architecture, the school has held many lectures and presentations at Clark Nexsen and Hanbury. In 2017, the Clark Nexsen Gallery displayed work highlighting the capabilities of the College's digital fabrication labs (shown above).
