[Safety Assessment Program] SAP Training

Post-Disaster Safety-Assessment Program (SAP) training provides architects, engineers, and building officials and inspectors with the knowledge to provide evaluation of facilities, buildings, and infrastructures in the aftermath of a disastrous event

ELIGIBLE PARTICIPANTS//

All building industry professionals are welcome and will receive a class attendance certificate.

Credentialed practitioners will be eligible to perform post-disaster assessments after successfully completing SAP training. Eligible practitioners include:

- Licensed architects
- Registered civil, structural, or geotechnical engineers
- Certified building officials and inspectors

PROGRAM DETAILS//

This full day, all-hazards, training session will refer to the SAP Evaluator Handbook as well as Applied Technology Council (ATC) Manual 20-1 or 45.

Trainers will share experiences from the field and will walk attendees through interactive case studies; demonstrating common damage and safety precautions.

6 AIA HSW CEUs will be earned

CERTIFICATION PROCESS//

The AIA Disaster Assistance Program is based upon California's Office of Emergency Services (OES) Safety Assessment Program (SAP).

After successfully completing AIA's SAP training, eligible individuals will earn a California-issued OES certificate and SAP ID card.

ENGAGE //

Seeking an instructor for a SAP training? AIA instructors are certified trainers who share personal stories from their official hands-on assessment experience. For a list of instructors, contact resilience@aia.org
