

AIA Strategic Plan
2021-2025

Forward

Strategic Plan 2021–2025

The American Institute of Architects, the profession, and the world we live in are at a crossroads. What we do now will define the future.

Over the course of 18 months, the Strategic Planning Committee interviewed and surveyed hundreds of people, members and non-members alike. What we heard is remarkable and consistent: Now is the time for real change and revolutionary thinking. For turning conversations and ideas into bold action in how we prepare for and shape the future of AIA and architecture.

This means an AIA and a profession that emphasize:

Climate action. To deliver real action to help mitigate climate change.

Justice and equity. To ensure equity in the profession, in our communities, and for all who inhabit the built environment we design.

The role of the architect. To help society recognize the value of their work in addressing the world's most pressing challenges.

Research and technology. To recognize that our unique knowledge defines who we are and what we do, and that innovation allows us to create a better world.

Architectural Education. To better prepare architects for the future and to include a true cross-section of society.

They also reminded us that we cannot do this alone, that we need to:

Create a bigger tent. Collaborate with those who realize the power of design to solve problems.

Focus selectively on issues that really matter. Mobilize our resources, educate, and prepare architects while refocusing activities that are not part of our core values.

Prepare a new generation. Ensure today's emerging professionals are equipped with the tools and knowledge to lead the industry forward.

This Strategic Plan includes groundbreaking ideas; however, ideas alone are not enough. True change will come only through strategic action.

AIA Strategic Plan 2021–2025

Introduction

The American Institute of Architects will deliver profound change through this strategic plan: for our members, our profession, our communities, and our planet.

Key principles and guiding assumptions that informed the development of this plan include:

Urgency. The global climate crisis requires immediate, bold action to bring about meaningful change. Underpinned by AIA’s recent Big Move Toward Environmental Stewardship, the strategic plan amplifies this call to action for our members to redouble our efforts to develop solutions that will address the existential challenge of our time.

Alignment. The principal activities of AIA should be coordinated, focused, and deliberate. We will use our capabilities, scale, and structure to bring new levels of efficiency and impact to our work.

Collaboration. The role of the architect is changing dramatically. To realize our full potential as professionals and as an Institute, it is essential that architects collaborate: within firms, in professional relationships, and in communities. AIA will provide leadership to engage a broad network of professionals and community leaders to develop solutions.
