## Letter from Robert Ivy, FAIA

It is my pleasure to release AIA's updated membership demographics report.

The global pandemic of 2020 impacted the architectural profession and created a fundamental shift in the way many conducted their work. However, our members remained resilient in the face of these new challenges. In 2020, AIA's more than 94,000 members consisted of architectural professionals, including licensed professionals, individuals pursuing licensure, and those on a non-traditional path. Together, all members are part of thriving community dedicated to advancing the profession and creating a more just and sustainable built environment.

Please note, reporting demographics is fully at the discretion of our members and many have made the decision not to disclose this information. We are currently working to update our options to allow members to better describe race and ethnicity along with gender identity and expression. We ask that current and future members provide this information to ensure that we have the most accurate accounting of who we represent and trends in the field.

Other reports confirm what we already know: women and members of racial and/or ethnic groups remain underrepresented in the profession. The statistical data in this report reflect that fact. However, it is also important to note that the data show that incoming cohorts are more gender, racially and or ethnically diverse, depending on the category.

Also, we have included the demographics of the Board of Directors, Strategic Council, and the national office staff.

If you have any comments on how we can improve the report, please reach out to [memberservices@aia.org](mailto:memberservices@aia.org).

---

## Background & overview

The American Institute of Architects (AIA) is a professional association that advocates for the value of architecture on society and delivers resources to those working in design to do their best work. Our membership community represents more than 94,000 design professionals, from licensed architects to those pursuing architecture licensure to those on a nontraditional path in design.

The following report aggregates key demographic trends regarding AIA membership, Board of Directors, Strategic Council, and national staff. Please note that while AIA's membership is an extensive community of more than 94,000 architectural professionals, participation in AIA is not mandatory to practice, and not all AIA members are licensed in the United States. Therefore, any current and future reporting on the demographics of AIA members should not be construed as a census of the entire profession. Additionally, reporting demographic information to AIA is not a prerequisite for membership and is strictly voluntary, and some members choose not to disclose their race and/or ethnicity, gender identity and expression, or age. In some cases, nonreporting makes it challenging to fully determine AIA's member demographics.

Full definitions for our membership categories can be found in the appendix.

Beyond this report, members and others may be interested in numerous other data sources that report on the profession. Please refer to data resources provided by:

- National Architectural Accrediting Board, Inc. (NAAB)
- National Council of Architectural Registration Boards (NCARB)
- U.S. Bureau of Labor Statistics in the U.S. Department of Labor
- U.S. Census Bureau in the U.S. Department of Commerce

Key findings from these sources are provided in this report as a benchmark for AIA's numbers and show the pipeline into the profession.

---

## Key findings

While the reported diversity of AIA's membership increased during 2020, the long-term implications of the COVID-19 pandemic on design professionals are still to be determined. Of particular interest is the impact the pandemic has had on individuals entering the field of architecture, both through accredited educational programs and nontraditional paths, as well as how different demographic groups were impacted by the downturn. For example, preliminary research on gender by the National Bureau of Economic Research finds that, unlike in prior recessions, women have been more impacted by the downturn due to the particular sectors in which women work and childcare responsibilities.<sup>i</sup> AIA will monitor any developing trends closely.

The U.S. Census Bureau tracks and projects the demographics of the United States. In a recent report, the bureau forecasts that 2030 will represent a turning point in U.S. demographics as Americans above the age of 65 will outnumber those below the age of 18, and immigration will be the main driver of population growth, leading to a more diverse society.<sup>ii</sup>

The profession of architecture will be influenced by changes in U.S. demographics in the coming decades. Reported statistics from the National Association of Architectural Accrediting Boards (NAAB) on graduates and from the National Council of Architectural Registration Boards (NCARB) on newly licensed individuals show a more diverse pipeline into the profession.

AIA's membership reflects steady growth in the number of women and underrepresented racial and/or ethnic groups, though white men make up the majority of AIA's membership. Data clearly show that incoming cohorts of future architecture professionals are more gender and racially and/or ethnically diverse than the profession today.

## Key findings

### AIA member gender identity and expression

AIA's membership has become more gender diverse over time. This is attributed in part to several key factors.

- NAAB reports that women make up nearly half of enrolled students and graduates from NAAB-accredited architecture programs, indicating gender diversity in the pipeline to the profession.<sup>iii</sup>
- NCARB reports that in 2020 women made up 42% of those completing the ARE and 44% of those completing AXP requirements, up from 35% and 39%, respectively, in 2012.<sup>iv</sup>
- The trends in the profession are reflected in AIA's membership. The overall percentage of women members has grown by 8 points since 2012, to 25.1% in 2020. Across all member categories, 42.7% of first-time joining members were women in 2020.
- There is a higher share of women in the Associate membership category (41.4% in 2020) than in overall membership. Likewise, a consistently strong share of Associate members obtaining their licenses are women (40.4% in 2020).

### AIA member race and/or ethnicity

AIA is committed to increasing equity and diversity within the profession and encouraging members to provide race and/or ethnicity data. It is important to note that incomplete member data on race and/or ethnicity as a result of under-reporting impacts our ability to show trends. In 2020, 17.1% of AIA members did not report a race and or an ethnicity. However, there are data points that reveal trends.

- In 2019, NAAB reported that 30.3% of its graduates were from underrepresented racial and ethnic groups. The highest shares of underrepresented racial and ethnic groups were Hispanic/Latina/o and Asian at 14.3% and 8.5%, respectively.<sup>v</sup>
- NCARB reports that 29% of people completing the ARE “identified as a person of color” in 2020. Asians made up the second largest proportion of those completing exams at 13.71%.<sup>vi</sup>
- Sixteen percent of AIA members across all member categories identify as belonging to an underrepresented racial or ethnic group, while just under 67% were white.
- Within the Associate membership category, a greater number of members identify as underrepresented races and ethnicities than in the membership as a whole, growing 12.3 points since 2012.

# Overall performance

## Historical member performance

AIA's overall membership increased each year between 2012 and 2019, from just over 81,000 in 2012 to over 95,000 in 2019. Membership decreased in 2020 due to the global pandemic and ensuing economic environment, its first decline since the 2008 recession and recovery.

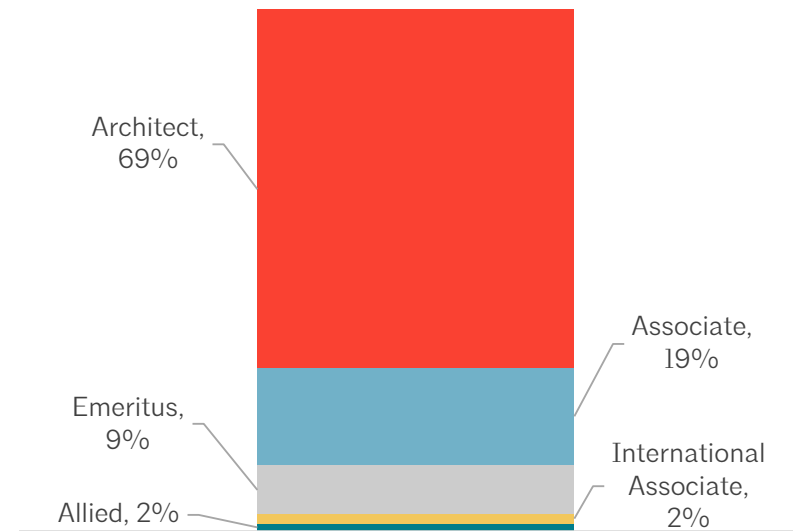

> OVERALL MEMBERSHIP TREND

## 2020 membership breakdown

Please see the definitions section for full definitions of our membership categories.

> MEMBERSHIP

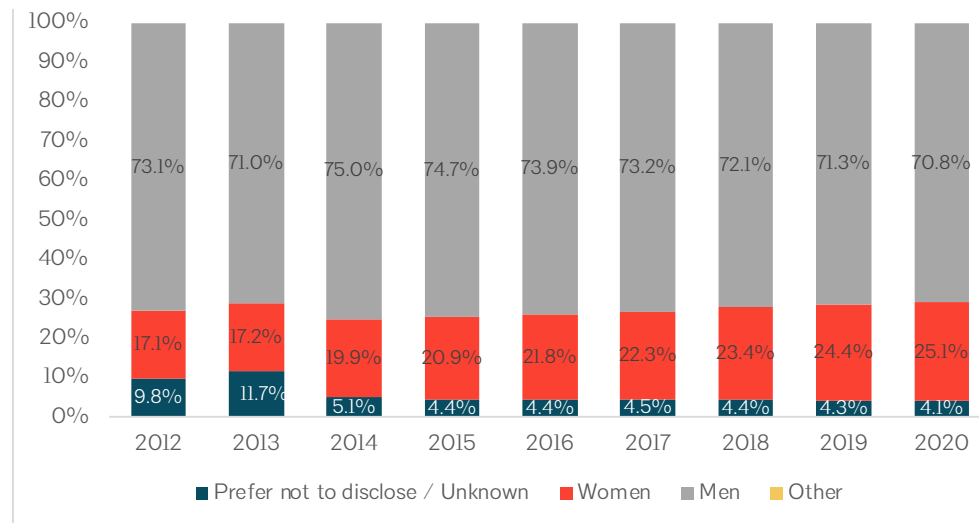

PLEASE NOTE DUE TO ROUNDING PERCENTAGES MAY NOT ALWAYS TOTAL 100%. EMERITUS MEMBERS MAY BE EITHER FORMER ARCHITECT OR ASSOCIATE MEMBERS.

# Gender identity & expression

## Gender: All members

Gender diversity within overall AIA membership has continued to grow, with the share of women increasing from 17.1% in 2012 to 25.1% in 2020. Please note that starting in 2018, a third option was made available to members to expand the binary options of “men” and “women.” Moving forward, the options for members to describe their gender identity and expression will be female, male, nonbinary, self-described, and prefer not to say.

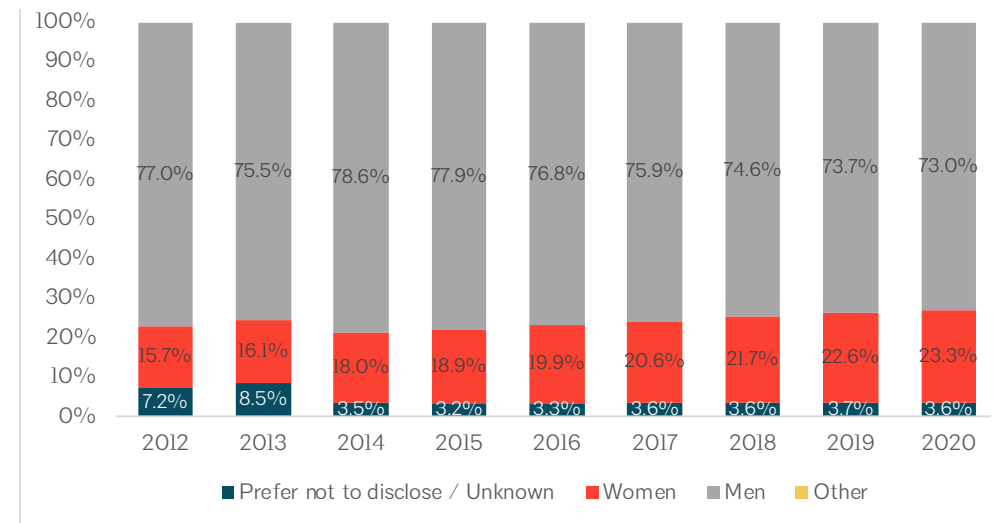

> GENDER: ALL MEMBERS

## Gender: Architect members

Trends in gender diversity for Architect members are comparable to those in the overall membership, with the percentage of women increasing from 15.7% to 23.3% between 2012 and 2020.

> GENDER: ARCHITECT MEMBERS

PLEASE NOTE THAT STARTING IN 2018 MEMBERS WERE GIVEN THE OPTION "OTHER." MOVING FORWARD, MEMBERS WILL HAVE ADDITIONAL OPTIONS TO DESCRIBE THEIR GENDER IDENTITY AND EXPRESSION.

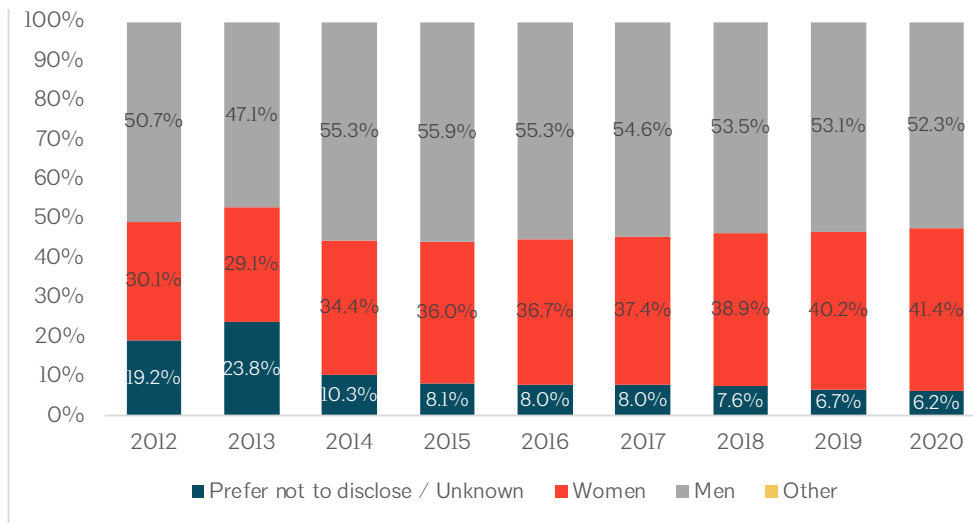

# Gender identity & expression

## Gender: Associate members

Associate membership continues to be more gender diverse than overall membership. In 2020, 41.4% of Associates reported their gender as women—higher than the overall membership share of 25.1%.

> GENDER: ASSOCIATE MEMBERS

## Gender: Associates obtaining licensure

The percentage of women Associate members obtaining their license is similarly high—40.4% in 2020. As a comparison, in 2020 NCARB reported that 42% of those who completed the ARE were women.<sup>vi</sup>

> GENDER: ASSOCIATES OBTAINING LICENSURE

PLEASE NOTE THAT STARTING IN 2018 MEMBERS WERE GIVEN THE OPTION "OTHER." MOVING FORWARD, MEMBERS WILL HAVE ADDITIONAL OPTIONS TO DESCRIBE THEIR GENDER IDENTITY AND EXPRESSION.

## Race and/or ethnicity

### Race and/or ethnicity

Unreported race and/or ethnicity data continues to make it difficult to measure the diversification of AIA membership over time. However, there are some trends worth noting.

- The percentage of reported underrepresented racial and ethnic groups grew 4.7 points between 2012 and 2020 to 16.4%.
- The underrepresented racial and ethnic groups are American Indian or Alaska Native, Asian, Black or African American, Hispanic or Latino, Native Hawaiian or other Pacific Islander, and two or more races. Like gender, we are updating our demographic categories for race/ethnicity to expand the selection options so that members have a more inclusive and accurate means of reporting.

### > RACE AND/OR ETHNICITY: ALL MEMBERS

## Race and/or ethnicity

### > 2020 RACE AND/OR ETHNICITY BY GENDER IDENTITY

Race and/or Ethnicity	Men	Women	Other	Prefer not to disclose	Unknown	Grand Total

# Race and/or ethnicity

## Race and/or Ethnicity: Associate members

Associate membership continues to be more racially and/or ethnically diverse than AIA's overall membership. The reported percentage of members from underrepresented racial and ethnic groups in the Associate category has grown from 19.7% in 2012 to 32.1% in 2020, a 12.3-point increase for this period. Associates are, on average, younger and newer to the profession, so they should drive future demographic change of licensed architects.

> RACE AND/OR ETHNICITY: ASSOCIATE MEMBERS

# Race and/or ethnicity

<b>Total</b>	<b>15,355</b>	<b>16,176</b>	<b>17,094</b>	<b>17,540</b>	<b>17,776</b>	<b>17,051</b>	<b>17,670</b>	<b>18,239</b>	<b>17,634</b>

# Age

The median age of members remains stable; however, there is growth among older and younger cohorts. In 2020, the median age of members was 51, about where it has been since 2012 (51). However, the percentage of members above the age of 60 has increased by 5 points since 2012, while those aged 20–39 has increased by 2.9 points. The percentage of members in the 40–59 age range, which contains our current median, has shrunk by 7.3 points since 2012.

> AGE OF AIA'S OVERALL MEMBERSHIP

## AIA leadership

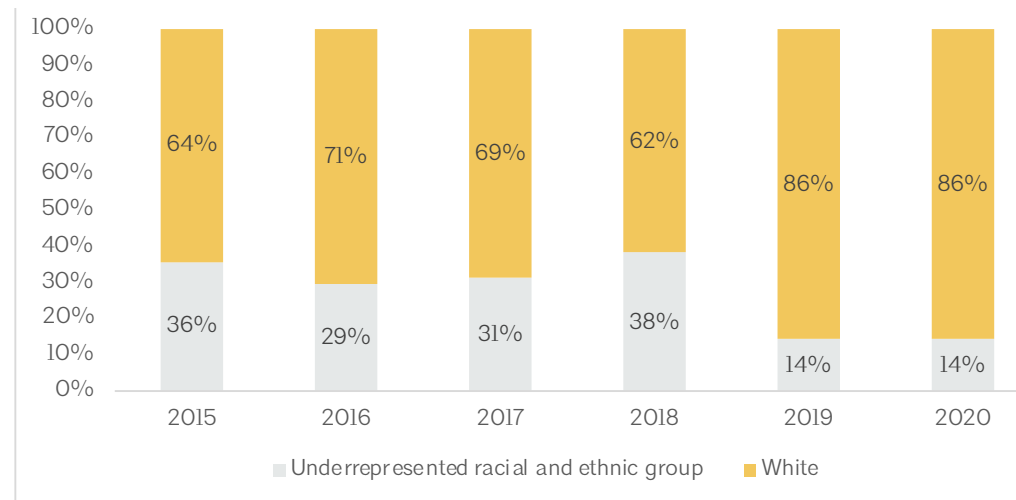

### AIA Board of Directors

The AIA Board of Directors' responsibilities include providing leadership to inspire the membership through the careful establishment of broad organizational values and perspectives. It approves AIA's strategic and operating plans as well as the annual operating budget.

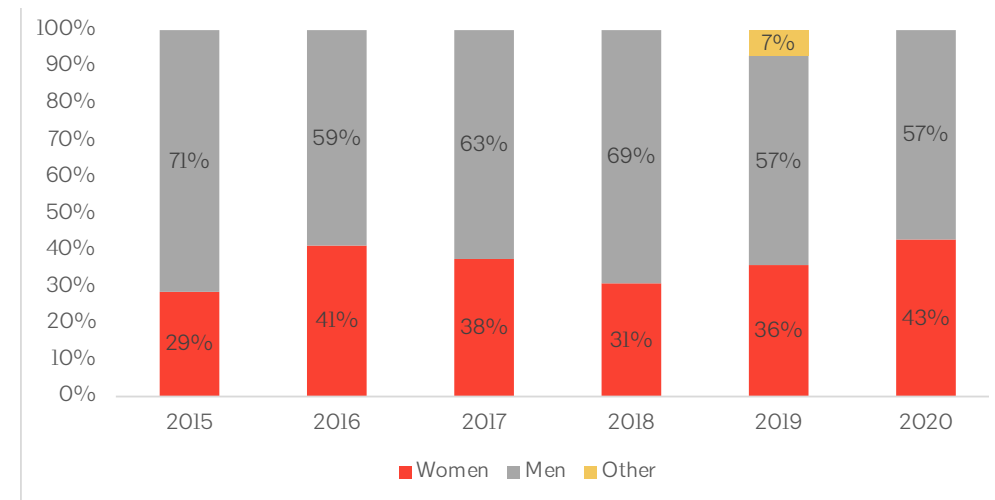

The board is composed of the officers (president, first vice president, secretary, and treasurer); six at-large directors; and representatives from the Council of Architectural Component Executives (CACE), the National Associates Committee, and the American Institute of Architecture Students (AIAS). The president may appoint up to two additional directors for one-year terms. The EVP/chief executive officer is also a member, ex officio.

Note: In 2015, when this data collection started, the Institute's governance was restructured (the board size was reduced and the Strategic Council was created). The board's composition has varied over the years; in 2020, there were 14 members.

#### > LEADERSHIP: BOARD OF DIRECTORS BY RACE AND/OR ETHNICITY

#### > LEADERSHIP: BOARD OF DIRECTORS BY GENDER

## AIA leadership

### AIA Strategic Council

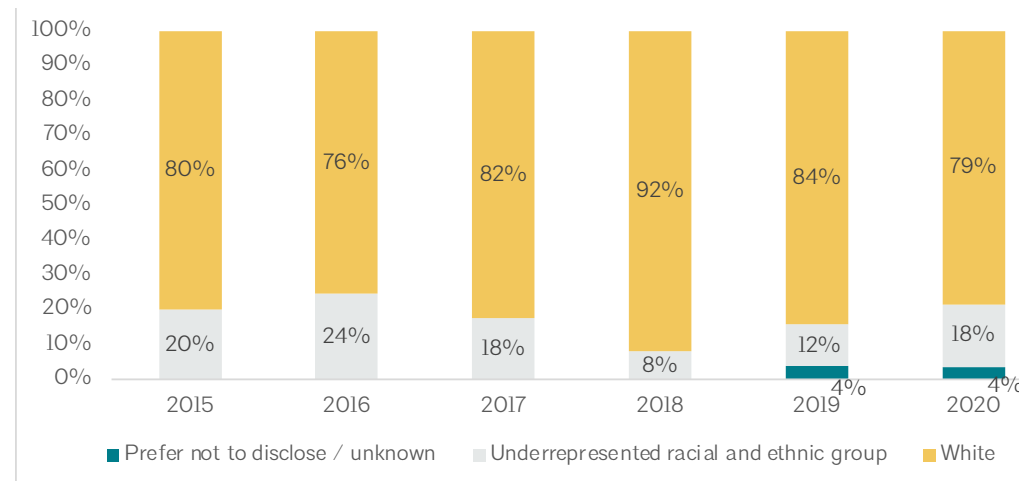

The Strategic Council is charged with advancing the profession of architecture by informing the board and other AIA bodies of important professional issues and opportunities.

It is composed of the officers (president, first vice president, secretary, and treasurer), the immediate past president, and the EVP/chief executive officer, ex officio. The Institute's 19 regions are represented, and up to 10 at-large representatives are elected by the council. The council also includes representatives from CACE, the National Associates Committee, and AIAS.

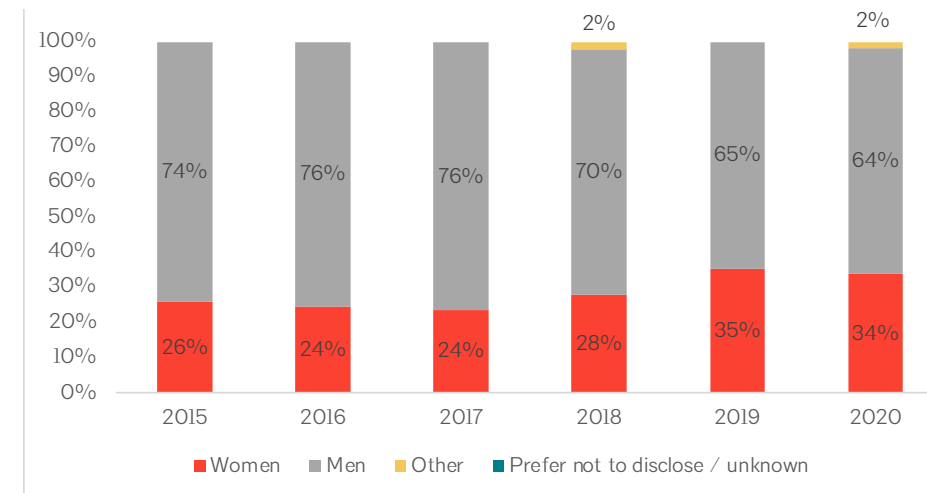

In 2020, there were 56 members of the Strategic Council.

A full overview of the AIA's governance structure can be found in its bylaws.

#### > LEADERSHIP: STRATEGIC COUNCIL BY RACE AND/OR ETHNICITY

#### > LEADERSHIP: STRATEGIC COUNCIL BY GENDER

## AIA national employees

### AIA national employees

There are 175 employees working in or for the AIA national office, located in Washington, DC, as of 2020. They work in a diverse set of areas to advocate on behalf of the profession of architecture, providing research on trends in the profession and administering programming to more than 94,000 professional members. Note that these demographics do not include the employees of AIA's 200+ components across the U.S. and world; these data cover only those employed in the national office. (This is how the data was collected at the time.)

## Definitions

For the purposes of this report, overall membership is defined as the member types: Architect, Associate, International Associate, Emeritus, and Allied. Unless otherwise stated, the Architect category includes licensed architects and Fellows, while Emeritus members are treated separately. Unless otherwise stated, Associate and International Associate members are treated separately. No Honorary or Local Affiliate members were included in this analysis. National Allied members are not shown as a unique segment in this report because of their low prevalence within membership. Their demographics are included in the overall membership totals.

**Architect:** Individuals who are currently entitled under law to practice architecture and use the title architect in any state of the United States are eligible to be Architect members. This includes AIA Fellows.

**Associate (non-international):** Individuals without architectural licenses from a U.S. authority who meet any of the following requirements:

1. Those who are eligible by education or experience and are employed, enrolled, or participating in circumstances recognized by licensing authorities as constituting credit toward architectural licensure.
2. Those who are employed under the supervision of an architect in a professional or technical capacity directly related to the practice of architecture.
3. Those who have professional degrees in architecture.

4. Those who are faculty members in university programs in architecture and who are actively involved in research, administration, or the teaching of architecture.

**International Associates:** Individuals without architectural licenses from a U.S. licensing authority who have an architectural license or equivalent from a non-U.S. licensing authority are eligible to be International Associates. Such persons may be residents within or outside the U.S.

**Emeritus:** Architect and Associate members who have been in good standing in AIA who have attained the age of 70, are retired or so incapacitated that they can no longer work, and have either:

5. 15 consecutive years of membership, or
6. 25 cumulative years of membership with the three most recent years consecutively in good standing.

The AIA secretary may waive the age and period requirements on a case-by-case basis.

**Race and ethnicity:** According to the U.S. Census Bureau, the racial categories included in the census questionnaire generally reflect a social definition of race recognized in this country and are not an attempt to define race biologically, anthropologically, or genetically. In addition, it is recognized that the categories for race include racial and national origin or sociocultural groups. People may choose to report more than one race to indicate their racial mixture, such as “American Indian” and “white.” People who identify their ethnicity as Hispanic, Latina/o, or Spanish may be of any race.

## Underrepresented racial and/or ethnic groups

These groups include American Indian or Alaska Native, Asian, Black or African American, Hispanic or Latino, Native Hawaiian or other Pacific Islander, and two or more races. Like gender, we are updating our demographic categories for race/ethnicity to give members an accurate means of reporting.

## Methodology & references

All data and visuals were created from historical year-end member rosters maintained by AIA unless otherwise noted. AIA data includes reported age, gender expression and identity, and race and ethnicity information.

Associate status changes are determined based on whether a member was an Associate one year and an Architect the next.

NCARB’s 2021 report describes 2020 data. NAAB’s 2019 report describes 2019 data. At the time of publication, NAAB’s 2020 report was not available, so 2019 numbers were used for comparison.
