Judging Criteria, Jury List & Release From

<p>Deadline and entry fees</p>	<p>It's a life necessity, a sanctuary for the human spirit, and many people's first and most personal encounter with architecture: The house. By recognizing the best in home design, AIA Housing Awards show the world how beauty, safety, sustainability, and comfort can come together.</p> <p>All projects must demonstrate design excellence. The jury evaluates entries based on how successfully projects perform in each category. The jury will evaluate all projects with the following considerations:</p> <ul style="list-style-type: none">• Equity: How does the project support social impact goals and contribute to community context and history? See focus areas included under Design for Equitable Communities in the AIA Framework for Design Excellence.• Resilience: To what extent does the project plan for climate and community change? How do environmental performance measures contribute to long-term sustainability? See focus areas included under Design for Change in the AIA Framework for Design Excellence.• Innovation + Delight: To what extent does the project model leadership in the field and enhance our understanding of residential architecture and/or community development? See focus areas included under Design for Integration and Design for Discovery in the AIA Framework for Design Excellence. <p>The jury will review and consider the visual PDF submitted, AIA Framework for Design Excellence narratives and metrics, and additional housing and community development-specific questions in full.</p> <p>The jury evaluates entries relative to the AIA Framework for Design Excellence. Submitted projects do not have to adhere to all measures but need to address several of them. Submitters are strongly encouraged to consider their submission materials in this context.</p> <ul style="list-style-type: none">• the deadline for submission is October 20, 2022 prior to 5pm Eastern - all deadlines are strictly observed• the non-refundable entry fee per entry is \$375 for members and \$750 for non-members with the exception of category two as noted above

Framework for Design Excellence Overview	<p>In 2019, the AIA adopted the Framework for Design Excellence as the set of guidelines and requirements to assess project performance. Climate change requires a holistic approach, addressing the interdependencies among people, buildings, infrastructure, and the environment. The Framework for Design Excellence provides the elements that support this vision during project evaluation. While projects submitted do not need to address all the measures included in the framework, they need to highlight</p>

	<p>how they perform in this context and highlight relevant narratives and metrics when applicable.</p> <p>In the following sections, please provide narratives and relevant metrics to the specific measures that apply to your submission. Add N/A when not applicable or when information is not available, where relevant explain why this is the case. Submitters are expected to provide as much accurate data as possible.</p>
Design for Integration*	<p>1. <u>Design for integration</u> (500 words) Good design elevates any project, no matter how small, with a thoughtful process that delivers both beauty and function in balance. It is the element that binds all the principles together with a big idea. Describe how the project demonstrates design for integration. These guiding questions are a starting point for thinking about your project’s performance.</p> <ul style="list-style-type: none"> • What was the concept or purpose behind this project, and how did the priorities within the nine other principles inform the unique approach to this project? • How does the project engage the senses and connect people to place? • What makes the project one that people will fight to preserve? • What design strategies can provide multiple benefits across the triple bottom line of social, economic, and environmental value?
Design for Equitable Communities*	<p>2. <u>Design for equitable communities</u> (200 words) Design solutions affect more than the client and current occupants. Good design positively impacts future occupants and the larger community. Describe how the project demonstrates design for equitable communities. These guiding questions are a starting point for thinking about your project’s performance.</p> <ul style="list-style-type: none"> • What is the project’s greater reach? How does this project contribute to creating a diverse accessible, walkable, just, human-scaled community? • Who might this project be forgetting? How did the design process and outcome remove barriers and promote inclusion and social equity, particularly with respect to vulnerable communities? • What opportunities exist in this project to include, engage, and promote human connection? • How does the design support health and resilience for the community during times of need or during emergencies?

Design for Ecosystem*	<p>3. <u>Design for ecosystem</u> (200 words) Good design mutually benefits human and nonhuman inhabitants. Describe how the project demonstrates design for ecosystems. These guiding questions are a starting point for thinking about your project's performance.</p> <ul style="list-style-type: none"> • How does the design support the ecological health of its place over time? • How does the design help users become more aware and connected with the project's place and regional ecosystem? • How does the design build resilience while reducing maintenance? • How does the project support regional habitat restoration?
Design for Water*	<p>4. Good design conserves and improves the quality of water as a precious resource. Describe how the project demonstrates design for water. These guiding questions are a starting point for thinking about your project's performance.</p> <ul style="list-style-type: none"> • How does the project use water wisely, addressing efficiency and consumption while matching water quality to appropriate use? • How does the project's water system maintain function during emergencies or disruptions? • How does the project handle rainfall and stormwater responsibly? • How does the project contribute to a healthy regional watershed?
Design for Economy*	<p>5. <u>Design for economy</u> (200 words) Good design adds value for owners, occupants, community, and planet, regardless of project size and budget. Describe how the project demonstrates design for economy. These guiding questions are a starting point for thinking about your project's performance.</p> <ul style="list-style-type: none"> • How do we provide abundance while living within our means? • How did the design choices balance first cost with long-term value?

	<ul style="list-style-type: none"> • How was the performance of this project improved in ways that are cost and design neutral?
Design for Energy*	<p>6. <u>Design for energy</u> (200 words) Good design reduces energy use and eliminates dependence on fossil fuels while improving building performance, function, comfort, and enjoyment. Describe how the project demonstrates design for energy. These guiding questions are a starting point for thinking about your project's performance.</p> <ul style="list-style-type: none"> • How did passive design strategies contribute to the project's performance and form? • How did the project exceed building code efficiency standards to approach net zero energy and net zero carbon? • Was the project powered by clean, renewable energy sources? • How does the project provide for continuous performance improvements over its lifetime?
Design for Well-being*	<p>7. <u>Design for well-being</u> (200 words) Good design supports health and well-being for all people, considering physical, mental, and emotional effects on building occupants and the surrounding community. Describe how the project demonstrates design for well-being. These guiding questions are a starting point for thinking about your project's performance.</p> <ul style="list-style-type: none"> • How does the design encourage a healthy lifestyle? • How does the project provide for greater occupant comfort? • How is the project welcoming and inclusive for all? • How does the project connect people with place and nature? • How did material selection reduce hazards to occupants?
Design for Resources*	<p>8. <u>Design for resources</u> (200 words) Good design depends on informed material selection, balancing priorities to achieve durable, safe, and healthy projects with an equitable, sustainable supply chain to minimize possible negative impacts to the planet. Describe how the project demonstrates design for resources. These guiding questions are a starting point for thinking about your project's performance.</p>

	<ul style="list-style-type: none"> • What factors (priorities) were considered in making material selection decisions? • How were materials and products selected and designed to reduce embodied carbon and environmental impacts while enhancing building performance? • How did material selection reduce hazards and support equitable labor practices in the supply chain? • How does the project promote zero waster throughout its life cycle? • How does the project celebrate local materials and craft? • How long will the project last, and how did that affect your material?
Design for Change*	<p>9. <u>Design for change</u> (200 words) Adaptability, resilience, and reuse are essential to good design, which seeks to enhance usability, functionality, and value over time. Describe how the project demonstrates design for change. These guiding questions are a starting point for thinking about your project’s performance.</p> <ul style="list-style-type: none"> • How does the project address future risks and vulnerabilities from social, economic, and environmental change? • How was the project designed for adaptation to anticipate future uses or changing markets? How does the project address passive survivability and/or livability?
Design for Discovery*	<p>10. <u>Design for discovery</u> (200 words) Every project presents a unique opportunity to apply lessons learned from previous projects and gather information to refine the design process. Describe how the project demonstrates design for discovery. These guiding questions are a starting point for thinking about your project’s performance.</p> <ul style="list-style-type: none"> • How did the design process foster a long-term relationship between designers, users, and operators to ensure design intentions are realized and the building project performance can improve over time? • How are performance data and experiential stories shared, even if the findings fall short of the vision? • What strategies promote a sense of discovery and delight?

Framework for Design Excellence Metrics

Years of Substantial Completion*	
*	What is the gross conditioned floor area (in sq. ft.) of the project?
*	What is the primary use type of the project?
*	Which of the following best describes the project site?
Design for Integration*	Was a design charrette or sustainability workshop conducted with owner and team?
Design for Equitable Communities*	<p>Which of the following levels of community engagement were used during the design process? (select all that apply)</p> <ul style="list-style-type: none"> <input type="checkbox"/> No community engagement practices were applied for this project <input type="checkbox"/> Inform: Potential stakeholders were informed about the project <input type="checkbox"/> Consult: Stakeholders were provided with opportunities to provide input at pre-designed points in the process <input type="checkbox"/> Involve: Stakeholders were involved throughout most of the process <input type="checkbox"/> Collaborate: A partnership is formed with stakeholders to share in the decision-making process including development of alternatives and identification of the preferred solution <input type="checkbox"/> Empower: Stakeholders were provided with opportunities to make decisions for the project <input type="checkbox"/> Unknown <input type="checkbox"/> Not applicable (please explain)
Ecosystem*	What percent of site area supported vegetation (landscape or green roof) pre-development?
Ecosystem*	

	What percent of site area supported vegetation (landscape or green roof) post-development?
Ecosystem*	What percent of site area is covered by native plants that support native or migratory species and pollinators?
Ecosystem*	Which of the following intentional design strategies were used to promote design for ecosystem? (select all that apply) <ul style="list-style-type: none"> <input type="checkbox"/> Biodiversity <input type="checkbox"/> Dark skies <input type="checkbox"/> Bird safety <input type="checkbox"/> Soil conservation <input type="checkbox"/> Habitat conservation, flora/fauna <input type="checkbox"/> Abatement of specific regional environmental concerns <input type="checkbox"/> None of the above <input type="checkbox"/> Unknown <input type="checkbox"/> Not applicable (please explain)
Water*	Is potable water used for irrigation?
Water*	Is potable water used for cooling?
Water*	Is grey/blackwater re-used on site?
Water*	Is rainwater collected on site?
Water*	What percent of stormwater is managed on site?
Cost	<p>Unless otherwise noted, AIA and the jury will keep financial information confidential. AIA will only describe financial information in public narratives with prior consent from the submitter.</p> <p>**Please note, the jury will not evaluate projects that are unwilling to disclose financial information to the AIA and the</p>

	jury, which means such projects will not advance to the finalist or winning stages. **
Cost	What is the cost per square foot for this project (report in USD/sq ft)?
Design for Economy Regional Comparison*	How does the cost to construct this project compare to similar buildings in the region?
Energy*	Using ZeroTool, what is the 2030 Commitment baseline EUI (in kBtu/sf/yr) for the project?
Energy*	What was the predicted EUI (in kBtu/sf/yr) of the project, including on-site renewables? Note: carbon offsets should not be counted
Energy*	What was the percent reduction from the benchmark? To calculate, first subtract predicted EUI from baseline; then divide by baseline.
Energy*	Is the project all-electric?
Well-being*	What level of air filters are installed?
Well-being*	Do greater than 90% of occupied spaces have a direct view to the outdoors?
Well-being*	Was a 'chemicals of concern' list used to inform material selection?
Resources*	Were embodied carbon emissions estimated for this project?
Resources*	What is the estimated embodied carbon emissions (in kgCO ₂ e/m ² /yr) associated with the project, including the

	extraction and manufacturing of materials used in construction?
Change*	What is the estimated service life of the project (in years)?
Change*	Which of the following best describes the project's ability to survive without utility power?
Change*	<p>Which of the following risk assessment and resilience services were provided? (select all that apply)</p> <ul style="list-style-type: none"> <input type="checkbox"/> Hazard identification <input type="checkbox"/> Climate change risk <input type="checkbox"/> Building vulnerability assessment <input type="checkbox"/> Hazard mitigation strategies above code <input type="checkbox"/> None of the above <input type="checkbox"/> Unknown <input type="checkbox"/> Not applicable (please explain)
Discovery*	Has a post-occupancy evaluation been conducted?
Discovery*	<p>Which of the following building performance transparency steps have been taken? (select all that apply)</p> <ul style="list-style-type: none"> <input type="checkbox"/> Present the design, outcomes, and/or lessons learned to the office <input type="checkbox"/> Present the design, outcomes, and/or lessons learned to the profession <input type="checkbox"/> Present the design, outcomes, and/or lessons learned to the public <input type="checkbox"/> Publish post-occupancy data from the project <input type="checkbox"/> Publish lessons learned from design, construction, and/or occupancy <input type="checkbox"/> None of the above <input type="checkbox"/> Unknown <input type="checkbox"/> Not applicable (please explain)

Upload Materials for Jury Review

<p>Upload Materials for Jury Review</p>	<p>Project images must be submitted in a single .PDF file not to exceed 20 MB and 24 pages.</p> <p>When possible, images should include the building in use. At a minimum, photos should be submitted as described in the following list, in any order, to best tell the jury your project's story:</p> <ul style="list-style-type: none"> • Include at least one photograph of each building façade. Projects that do not include photographs of each elevation will not be considered for awards. • Include photographs of the site context showing all adjacent structures and/or natural features. Projects that do not include context photographs will not be considered for awards. • Provide photographs of primary interior spaces. • For projects involving renovations or alterations, provide 'before' and 'after' images. To the extent possible these images should describe the new work. • Provide a site plan showing the building and its context, a building section, and floor plans with a graphic scale and an orientation arrow. • Label renderings. Rendering may not be substituted for required photographs. • Provide additional information such as construction details, diagrams, and/or performance data necessary to explain your project. <p>Additional Tips</p> <ul style="list-style-type: none"> • Composite pages are acceptable. • Text/notes on images/drawings are allowed. • Use of the maximum page limit is strongly recommended. • Consistent use of either a horizontal or portrait landscape is encouraged throughout the submission.
